RHOMBUS

SIMPLE & RECYCLED

Rodeca Rhombus made of Polycarbonat provide a weather-resistant alternative to wood. They can not only be manufactured from a high percentage of recycled polycarbonate, but also be processed into recyclable material after use.

EXTERIOR

In no time, create a new, modern, and low-maintenance cladding for your project. Whether it's individual accents or entire facades, Rodeca Rhombus can be effortlessly tailored to almost any surface. The concealed attachment using aluminum fastening clips results in a uniform surface without visible screws.

INTERIOR

The Rodeca Rhombus can also be the solution to create aesthetic accents indoors. Achieve unique effects, whether for shops, trade fair construction, reception areas, or for your own living space. Rodeca's Rhombus profile strips are easy to install and also dismantle.

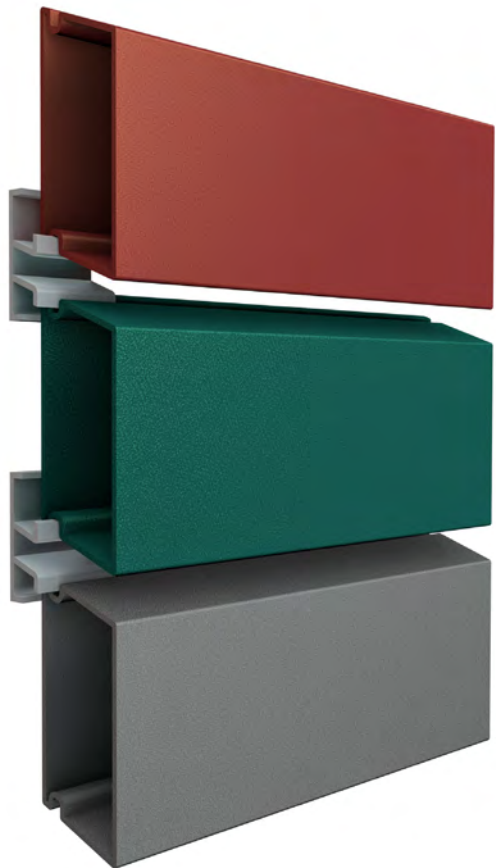

GARDEN

From cladding for a raised bed to wall covering or fencing elements, the versatile applications of Rodeca Rhombus profile strips enable numerous ideas and projects in the garden. The advantages such as weather resistance, quick and easy adaptation and installation, as well as durability and low maintenance speak for themselves. Overall, Rodeca Rhombus profile strips offer an attractive and practical solution for the design of numerous projects that are both aesthetically pleasing and functional.

COLOURS

Whether subtle and minimalist or as a striking focal point, the Rodeca Rhombus can be produced in nearly any color, accentuating the unique character of your project. The Rodeca color palette offers you maximum design possibilities!
